

PCC130 (SW)

HIGH-PERFORMANCE BOUNDARY LAYER MICROPHONE

MAKE YOUR STATEMENT

The PCC130 (left) is a boundary layer microphone of professional quality that, due to its small size, fits perfectly on small tables. Thanks to low self-noise and very high sensitivity, the microphone picks up even distant voices clearly and naturally. A bass-tilt switch allows the user to tailor the low-end response and reduce subsonic noise.

The PCC130 SW (right) has a silent-operating programmable membrane switch that can be configured for touch ON/OFF, momentary ON or momentary OFF. A high-intensity LED lights when the unit is on. For easy installation, both microphones offer an XLR connector and a detachable cable.

HIGHLIGHTS

- » **PCC® (Phase Coherent Cardioid®) technology**
for optimum speech intelligibility
- » **Three-position bass-tilt switch**
for optimized suppression of subsonic noise
- » **Silent-operating ON/OFF switch (PCC130 SW only)**
to reduce the number of simultaneously open mics
- » **Detachable cable**
easy to install and service

APPLICATIONS

- » Conference
- » Courtroom
- » Distance-learning applications
